

# Microsoft Purview: Data Security Posture Management and Data Loss Prevention Accelerator

Discover, prioritise and protect your data with Microsoft Purview's DPSM and DLP capabilities

For more information on this, or our wider **Security and Governance** services, speak to a Cloud Direct Sales Executive or contact hello@clouddirect.net.

## Service overview

Your data is one of your most valuable assets – but only if it's stored, shared, and secured in the right way.

Cloud Direct's Purview DSPM and DLP Accelerator helps organisations understand where their sensitive data lives, how it moves, and how it is protected, before rapidly translating insight into enforceable controls. Using Microsoft Purview DSPM and DLP, we establish visibility, prioritise risk, and implement sustainable data protection policies across Microsoft 365, SaaS, and multi-cloud environments.

## Who is this service for?

Organisations that need visibility, governance, and enforceable data protection controls across Microsoft 365 and connected cloud services to protect and empower their data.

## Addressing your challenges

Business critical data stored in unseen locations

Copilot and Agents oversharing confidential data

No proof or lineage when regulators come knocking

## Expertise in action

Combining data discovery and risk analysis with designed and implemented Purview DLP controls, grounded in real posture.

### What we deliver

- A clear, evidence-based view of your data workflows, and risk scoring across your environment
- Risk identification across misconfiguration, oversharing, and AI-related data exposure
- Design and implementation of Purview sensitivity labels and DLP policies
- A sustainable, governed data protection model supported by clear roles and processes
- A roadmap for future protection planning, in line with your growth plans

## Outcomes that matter

We provide a clear understanding of data risk and deliver and working, enforceable protection model that enables confidence in scaling.

 Complete visibility of sensitive data access	 Clear prioritisation of high risk exposure	 Governance baselines aligned to GDPR and compliance standards	 Enforceable DLP controls based on discovery	 Reduced risk from oversharing and AI use	 Scalable data protection for long-term growth
