

SECURITY AND COMPLIANCE

# Microsoft Zero Trust Security Assessment

Better understand your security posture by measuring up against Microsoft's Zero Trust principles

For more information on this, or our wider **Security and Compliance** services, speak to a Cloud Direct Sales Executive or contact hello@clouddirect.net.

## Service overview

Never trust, always verify – that's how you best protect your business against ever-changing cyber threats.

Cloud Direct's Microsoft Zero Trust Security Assessment provides a clear, evidence-based roadmap to strengthen your security posture across M365 and Azure. We analyse your environment against Microsoft's seven Zero Trust pillars – Identity, Devices, Data, Network, Infrastructure, Security Operations, and DevSecOps – to highlight risks, prioritise remediations, and enable long-term resilience.

## Who is this service for?

Mid-to-large enterprises using M365 and Entra ID and seeking to strengthen their security posture by aligning to Zero Trust principles to combat increased cyber threats and meet compliance requirements.

## Addressing your challenges

Perimeter defences lag while identities and endpoints are under pressure

Disconnected tools weakening consistency across security controls

Increasing compliance demands without a clear security execution plan

## Expertise in action

A current-state Zero Trust assessment with prioritised actions, clear ownership, and a practical roadmap spanning identity, devices, data, apps and networks.

### What we deliver

- An expert-led workshop to collaboratively explore your security posture
- A clear understanding of your current position against the Zero Trust security model
- A step-by-step roadmap for best-practice Zero Trust adoption
- Actionable recommendations for prioritised, risk-ranked security improvements
- Guidance to build and maintain a secure, scalable platform for confident business innovation

## Outcomes that matter

Our assessment enables executives and security leaders to make confident, prioritised investment decisions regarding their security posture.

 Reduced credential compromise	 Stronger endpoint protection with policy consistency	 Limited attacker movement with least-privileged access	 Improved compliance with mapped controls	 Clear ownership aligned with teams and investments	 Secure hybrid work supported without harming productivity
--	---	---	---	---	--

## Cloud Direct's added value

Our team are Microsoft security specialists who translate Zero Trust concepts into clear priorities, owned actions, and measurable improvements that are aligned to your unique business goals.
